Hi I noticed that there was a recent press release announcing that your IO-Link Master 4-EIP now supports OPC UA which is great news as this makes them extremely easy to integrate with SAP systems

I had a look at the manual and it says that OPC-UA is only support by certain models, can you explain which ones support it?

If I had an older model would I be able to update it to OPC UA with a firmware update ??

A colleague is shipping me a IO-Link Master 4-EIP that we had in a lab to me to play with (its a few years old) as I have a demo with a client and if this supports OPC UA then this would be a perfect master for them.

Thanks  
Kevin (SAP UK)

Hi Kevin,

Thanks for your interest in the IO-Link Master!

In general, if the unit is more than a year old, it most likely does not have the OPC UA functionality built in, and unfortunately would not be field-upgradable to add OPC UA. Let me explore what options we have; would you mind please sending me your contact info by email?

Thanks,

Matt Mayfield
